Experiment: Data Visualization Using Tableau

Aim:

To demonstrate different data visualization techniques using Tableau.

Software Required:

Tableau Desktop / Tableau Public

Dataset Required:

Sample Superstore Sales Dataset - https://public.tableau.com/app/learn/sample-data

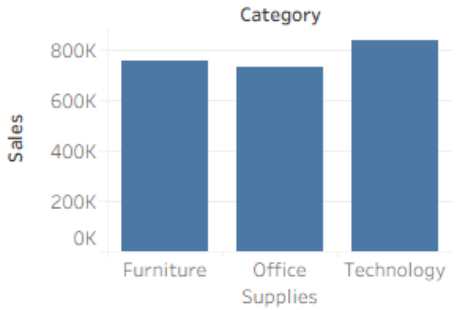

Procedure

1. Download the Sample Superstore dataset.
2. Open Tableau and connect the dataset.
3. Create a new worksheet.
4. Select the required fields for visualization.
5. Create a Bar Chart to compare sales by category.
6. Create a Line Chart to show sales trends over time.
7. Create a Pie Chart to show sales distribution.
8. Create an Area Chart to visualize sales growth.
9. Create a Scatter Plot to compare sales and profit.
10. Create a Histogram to show sales distribution.
11. Create a Box Plot to show profit distribution.
12. Create a Heat Map to compare sales by region and category.
13. Create a Treemap to visualize sales by category and product.
14. Create a Packed Bubble Chart to compare product sales.
15. Create a Dual-Axis Chart to compare sales and profit.
16. Create a Dashboard combining the visualizations.
17. Save the workbook and record the outputs.

Output

The required visualizations were successfully created using Tableau.

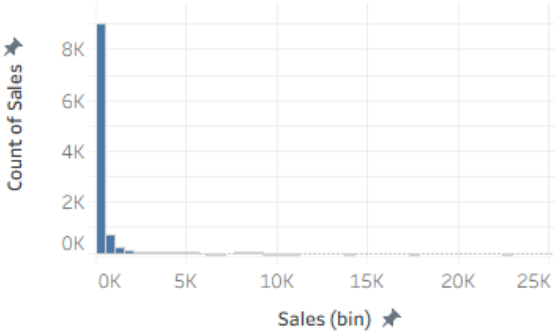

Bar Chart

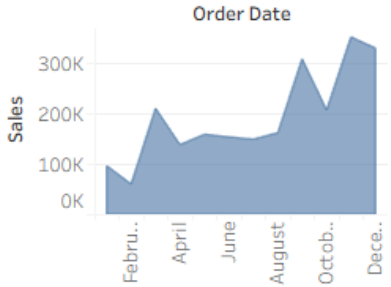

Line Chart

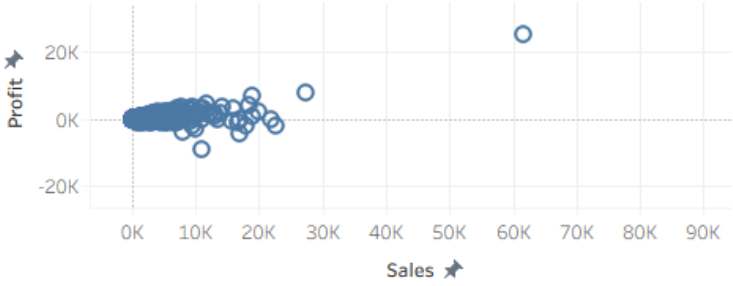

Histogram

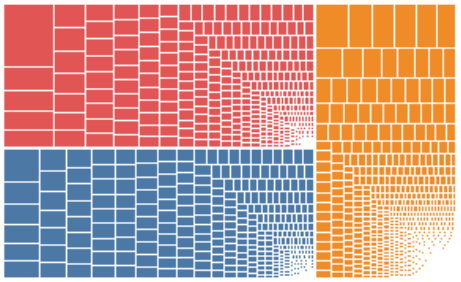

Area Chart

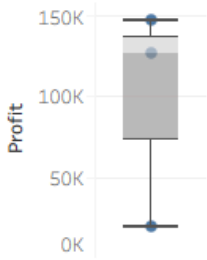

Scatter Plot

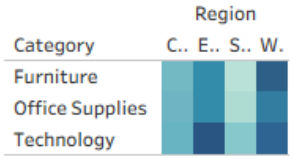

Treemap

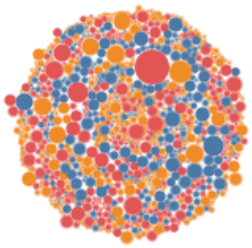

Box Plot

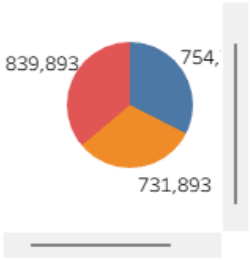

Heat Map

Packed Bubbles

Pie Chart

Dual-Axis Chart
